

Selecting a *Pediatrician*

A pediatrician is a physician who specializes in the treatment of children. When selecting a pediatrician, keep in mind:

- Is the pediatrician's clinic location convenient to your home, work, or your child's daycare or school?
- Are same-day and after hours appointments available?
- Are there other pediatricians available when your child's pediatrician is not available?
- Is there an online patient portal to message your child's doctor or nurse, book appointments, and view shot and medical records?
- Is there someone you can call 24/7?

At ARC we understand the importance of having a healthcare team available whenever you need it. We offer **Same-Day care** at every clinic with **After Hours care** at select clinics, access to **24/7 phone nurses** and 24/7 appointment **scheduling**, and an **online portal** to keep you connected to your child's health. You can have peace of mind knowing that when your doctor's office is closed, a pediatrician from our group is always on call.

Together our pediatricians and clinical staff work as a team, including ARC specialty doctors, using ARC's philosophy of coordinated and connected care. Appointments are available day or night, even weekends and holidays, at our convenient locations across Central Texas.

OUR VACCINE POLICY

The physicians and staff at Austin Regional Clinic support and strongly recommend vaccinations for all new and established patients. We strive to keep our clinics safe for infants who have not yet had the full range of vaccinations, as well as seniors, pregnant women, and many other individuals with compromised immune systems.
